

InterVid provides **End-to-End Solutions** to the Law Enforcement Community that include;

Digital and Physical Evidence Management

Local and Cloud Based Storage Solutions

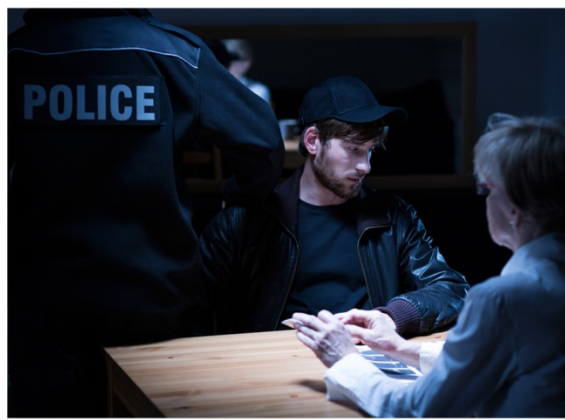

Audio and Video Interview Room Recording

Body Worn Cameras

In-Vehicle Video

City Streets Surveillance

InterVid's Needs Based Approach has us listen to client requirements, layer on our experience, and access a wide range of technology to design **Non-Proprietary Solutions**.

InterVid strives to provide solutions that **Always Place Our Client's Interests First**.

This philosophy has taught us above all else to adhere to the following key principals;

1. **Non-Proprietary Solutions** ensure the very best solutions, support and value; while protecting the client's interest by ensuring the client keeps leverage and control.
2. **Needs Based Solutions** assess the client's needs and then tailor the right system design to meet those needs as opposed to using a "Shoe Horn Approach" to fit the wrong solution because that is either all a provider has to offer or it is proprietary.

Body Worn Cameras

- High Definition (1080p) Resolution with 140° Wide Angle Lens
- Switchable On/Off Infrared and White Lights for Low Light Situations
